

# Strong Passwords

The best way to secure your account

## Outsmart the identity thieves

Identity thieves often get your information by guessing your password. Then they can target your savings and play havoc with your finances. Don't make it easy for them. Change your password periodically—and make it a good one.

## The key is complexity

- Make your password 7-20 characters—and use special characters if you like
- Include both upper and lower case letters
- Use at least 2 numbers—but not consecutive ones
- Don't use numbers at the beginning or end of your password
- You can use the first letters of a phrase—Jack and Jill went up the hill—then add numbers
- Or you can intentionally misspell a word

## Stay safe and Secure

Use these tips to create a strong password—one that will keep your account safe from identity thieves. If you ever suspect that you are the victim of identity theft, remember that Synchrony Bank provides you with free identity theft resolution services through IDT 911™—just to thank you for banking with us.

## We're here to help.

If you have any questions, or believe you may have been a victim of identity theft, please call us at 1-866-226-5638.
